# 5. NUTRITION AND SANITATION

## 5.1. NUTRITIONAL SECURITY IN INDIA

### Why in News?

India has slipped to 107<sup>th</sup> position in the Global Hunger Index (GHI) 2022 of 121 countries, from its 101<sup>st</sup> position in 2021.

### About the Global Hunger Index

- Annually published by Concern Worldwide and Welthungerhilfe.
- It was first introduced in 2006. The 2022 edition marks the 17<sup>th</sup> edition of the GHI.

### Status of Nutritional Security in India

- Index Score:** With a score of 29.1, the GHI finds the level of hunger in India “serious”.
  - India’s GHI score has decreased from alarming (in 2000) to serious (in 2022).
- Child wasting:** The index says child wasting indicating undernourishment in the country is 19.3%, the highest in the world.
- Undernourishment:** India’s proportion of undernourished in the population is considered to be at a medium level, and its under-five child mortality rate is considered low.
- Child stunting:** There has been a “significant decrease” from 54.2% in 1998-1999 to 35.5% in 2019-2021, although it is still “considered very high”.
- Comparison:** India’s neighbours such as Nepal (81), Bangladesh (84), Pakistan (99) and Sri Lanka (64) have got higher rankings in GHI.

## GLOBAL HUNGER INDEX (GHI)

## MALNUTRITION COMES IN MANY FORMS

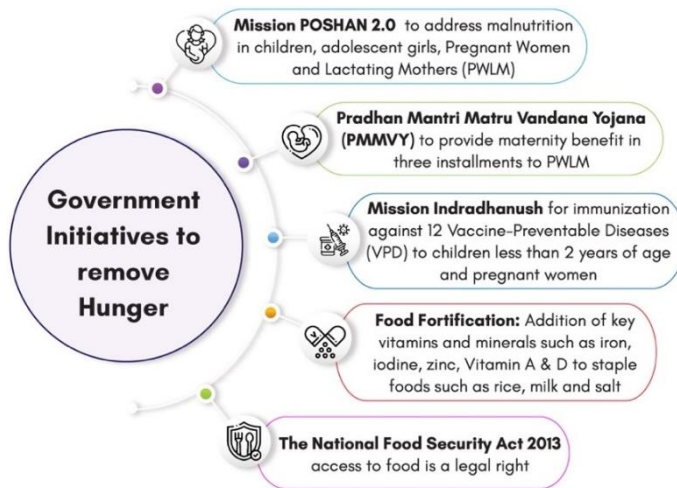

### Government of India Stand

- The Ministry of Women and Child Development said that index is an erroneous measure of hunger and suffers from serious methodological issues.
- The methodology used is unscientific. Government has highlighted that their assessment is on the results of a ‘four question’ opinion poll, was conducted telephonically and is unreliable.
- Estimate of Proportion of Undernourished (PoU), population is based on an opinion poll conducted on a very small sample size of 3000 based on “Food Insecurity Experience Scale (FIES)” Survey Module.

### Status of Nutritional Security in the world

- Stagnation in hunger reduction:** The 2022 GHI score for the world is 18.2, considered moderate, down slightly from the 2014 score of 19.1.
- Violent conflict:** According to the 2022 Global Report on Food Crises, conflict/insecurity was the main driver of acute food insecurity in 2021.
- Africa South of the Sahara and South Asia are the regions** with the highest hunger levels and are most vulnerable to future shocks and crises.
- The COVID-19 pandemic** has worsened the economic plight of low- and middle-income countries, slowing economic growth, driving up prices for goods and services, and increasing projected global poverty rates.
- Climate change** is putting stress on agriculture, forestry, fisheries, and aquaculture, increasingly impeding efforts to meet human needs.

### Know the term

<b>UNDERNUTRITION</b> When children don't eat or absorb enough nutrients to grow	<b>STUNTING</b> A form of undernutrition when populations of children are too short for their age	<b>WASTING</b> An extreme form of undernutrition when a child is too thin for his or her height
<b>HIDDEN HUNGER</b> When children don't get enough essential vitamins and minerals	<b>FOOD DESERT</b> As area or neighbourhood where there are few or no healthy food choices	<b>OVERWEIGHT</b> When a child's weight is too high for his or her height
<b>FOOD SYSTEMS</b> All the elements and activities involved in the production, processing, distribution, preparation and consumption of food	<b>OBESITY</b> The most severe form of overweight	<b>FOOD SWAMP</b> As area or neighbourhood where there are few or no healthy food choices

#### More on news

- Under the newly launched PMGKAY, **rice, wheat and coarse grains shall be provided free of cost for all**

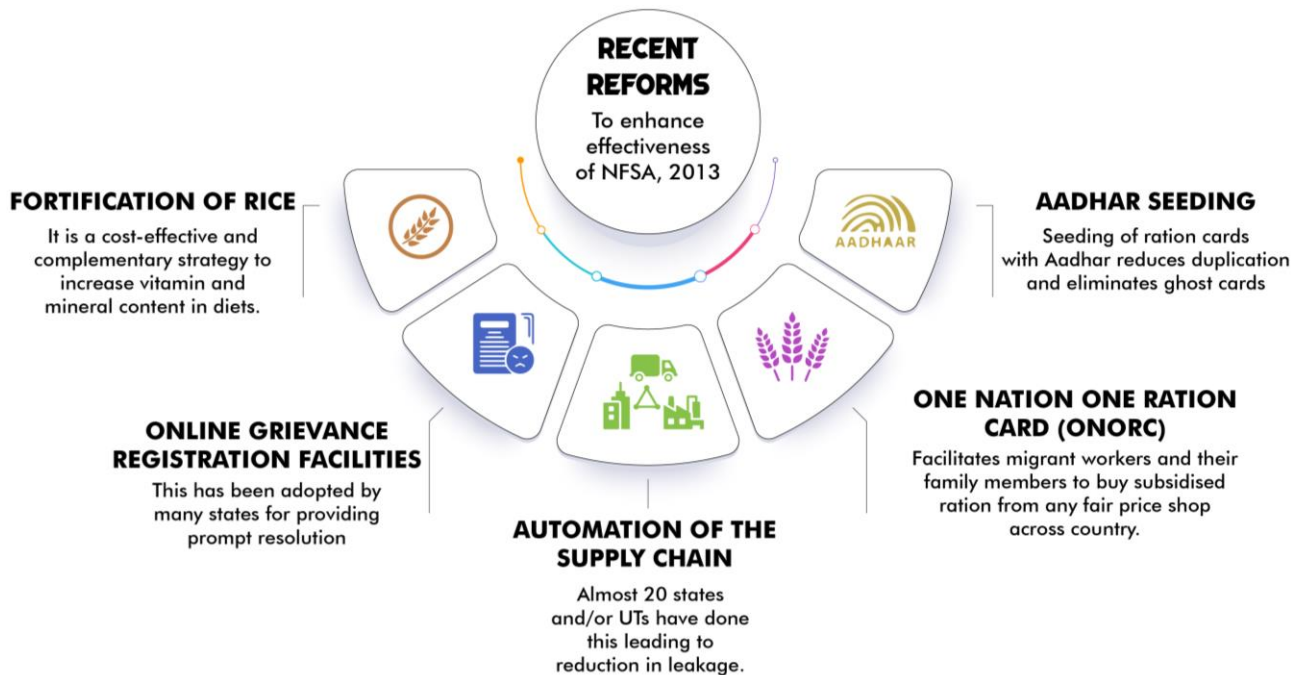

**Mechanism for Procurement of food grain:** Ministry of Consumer Affairs, Food & Public Distribution implemented two types of procurement policy

- Centralised procurement:** Procurement of food grains is undertaken by FCI directly/indirectly for storage and subsequent issue.
  - Difference between **Economic Cost and Central Issue Price (CIP)**, at which food grains are issued to States, is **reimbursed to FCI as food subsidy**.
- Decentralized procurement (DCP):** Under this scheme, the **State Government itself undertakes direct purchase** of paddy/rice and wheat and also stores and **distributes** these food grains under NFSA and other welfare schemes.

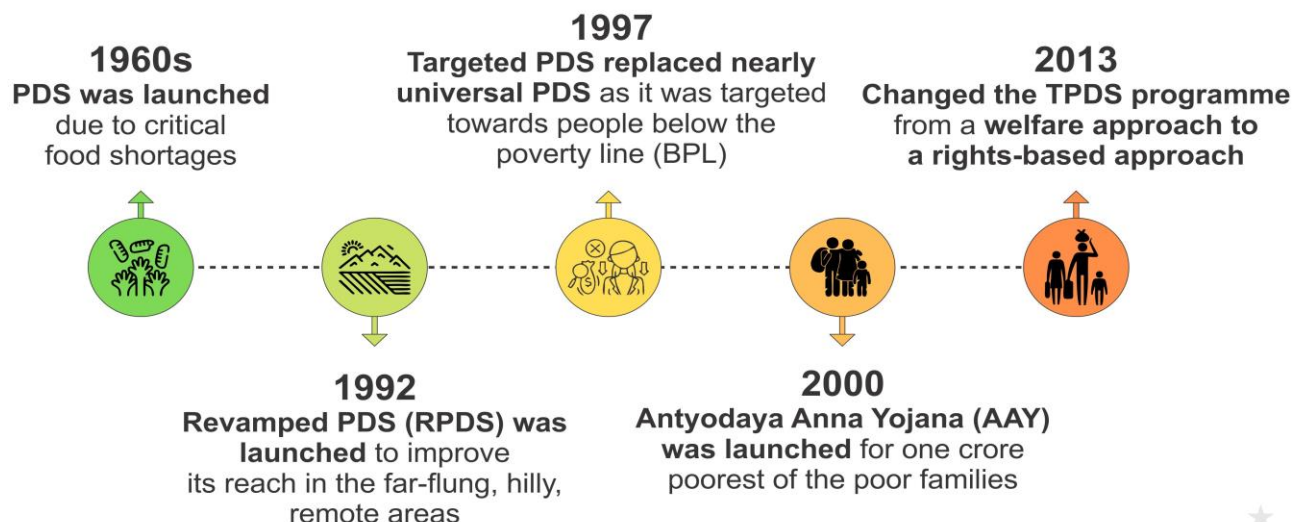

**eligible households** (both Primary HouseHolds and Antodaya Anna Yojana) under section 3 of the NFSA from **January 1, 2023 to December 31, 2023.**

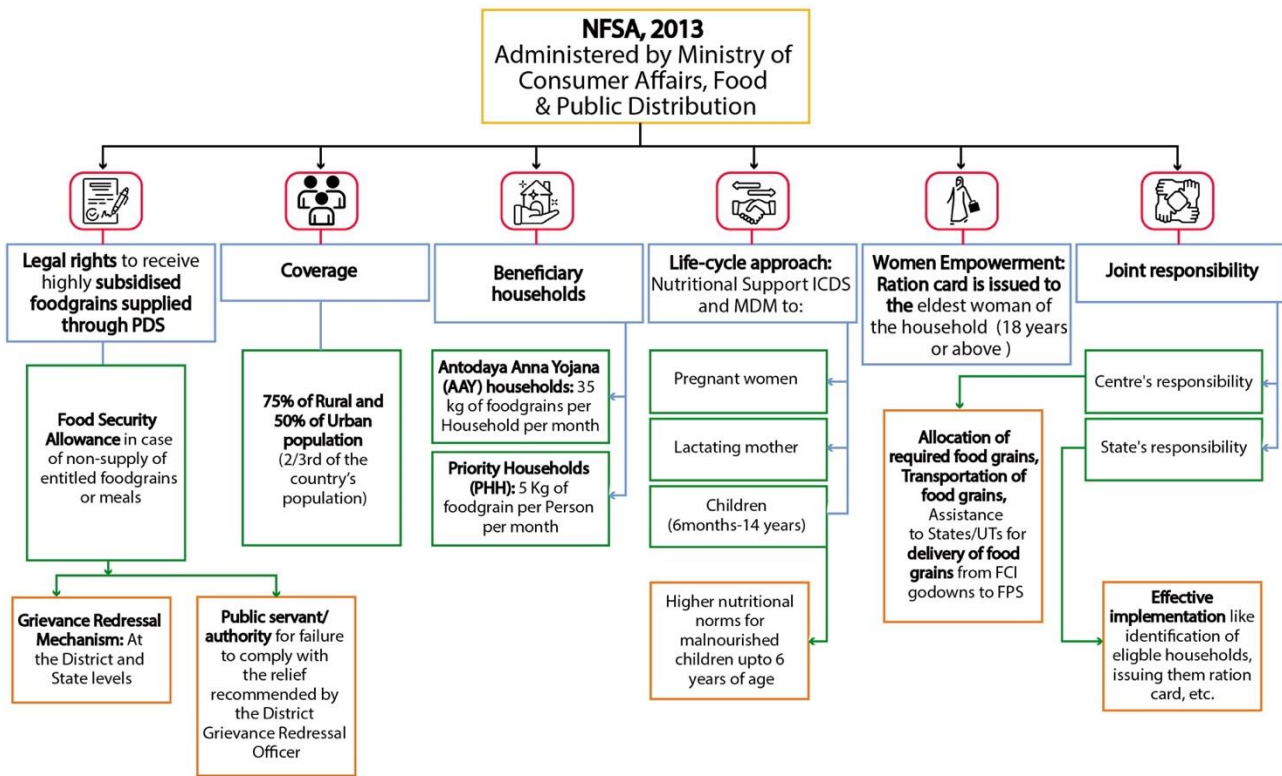

- Until now beneficiaries were paying the subsidised price called **Central Issue Price (CIP) worth Rs.1, Rs.2 and Rs.3 for Coarse-grains, wheat and rice respectively.**
- The **subsidised prices** are specified in Schedule-1 of the NFSA 2013, which the **government can change by executive order.**

- The PMGKAY is **subsuming two subsidy schemes (refer box)**
  - Food **Subsidy to Food Corporation of India (FCI).**
  - Food **Subsidy for Decentralized Procurement (DCP).**
- However, there will be **no changes in the issue prices of food grains supplied to States for other welfare programmes like mid-day meals (MDMs).**
- It should also be noted that this newly launched PMGKAY is **different form the PMGKAY that was launched in 2020 as a pandemic relief measure.**
  - In 2020 the PM GKAY was launched to provide **5 kg of free food grains to NFSA beneficiaries in addition to their monthly entitlement** (35 kg to a Antyodaya household and 5kg per person in a Priority Household) of **subsidized food grains** under the NFSA Act.
  - Now, **this scheme has been discontinued.**
